INSTRUCTIONS FOR SMART GUARD KEY

The Smart Guard key is an optional device that can be purchased that can either temporarily disable or totally disarm a Smart Guard Evolution Candle without the need of placing it back on a powered charging base.

To *Temporarily Disable* Smart Guard:

- Hold candle at slight angle, press the key in the candle. Once the red LED on the candle lights up, ***immediately release the key from the candle***.

Smart Guard is now deactivated until the candle is turned back on.

To *Totally Disable* Smart Guard:

- Hold candle at angle, ***press and hold the key in candle for 2 seconds***.
- The Red Led in the candle will light up and the candle will "beep" one time. When complete, Smart Guard will be disabled*.

**** Please note that when the candle is turned on again after using this feature Smart Guard WILL NOT ENGAGE.*** To reset the Smart Guard after using this feature, the candle will need to be set back on a powered charging tray.

The Smart Guard key was designed to be used only with Smart Candle Evolution Series that is equipped with Smart Guard. It is not designed to be used with other Smart Candle products.
