

**Glastender** FEATURE FOCUS

MAY 2010

**If it were any easier, they would clean themselves**

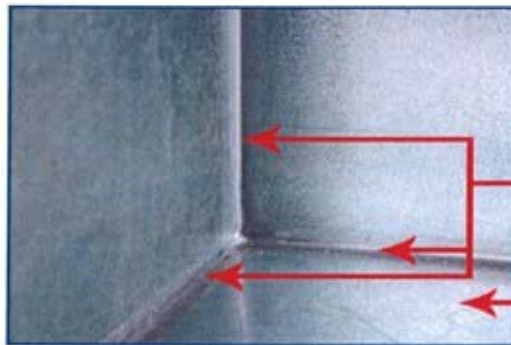

Our slidetop coolers have easy-to-clean radius interior corners. We make it harder for ourselves to make it easier for you.

**Glastender**

Front and rear interior panels extend around the side to eliminate corner seams

The stainless steel floor is formed into a pan with welded corners, eliminating floor corner seams

**The other guys**

Non-radius side and floor corner seams that are difficult to clean

No stainless steel floor allows standing water to cause rusting
