

## Glastender® FEATURE FOCUS

APRIL 2011

Redefining  
the **Rotary  
Glasswasher**

# GW24

**59%**  
LESS  
WATER

**87%**  
LESS  
ENERGY

In 1969, Glastender invented the world's first automatic rotary glasswasher. With the release of the all new GW24, we are redefining the category. The 24" by 24" GW24 has a fill and dump cycle that uses up to 59% less water and 87% less energy than common industry rotaries, while a computer controlled fill cycle allows for a 75°F (24°C) rinse, providing clean glasses that are cool to the touch.
