A lady was picking through the frozen turkeys at the grocery store but she couldn't find one big enough for her family. She asked a stock boy, "Do these turkeys get any bigger?" The stock boy replied, "No ma'am, they're dead." (thanks Bob)

It is believed that the Liberty Bell first developed a narrow crack in the 1840's about 90 years after it was made. As part of the repair in 1845, metal workers widened the crack to prevent further spread and to restore the tone of the bell, according to the National Park Service. "The wide crack in the Liberty Bell is actually the repair job," said the NPS. The repair was not successful, however, because a second crack formed, forever silencing the bell.
