Let's get comfortable with our food again.

Since our founding in 1939, Foster Farms has been dedicated to the careful stewardship of our flocks & farms. Now we're taking it a step further by offering chicken raised with No Antibiotics Ever and Organic chicken. We blend our own feed & hatch our own chicks. We take pride in every step on the way to bringing you the quality your customers deserve!

OUR HERITAGE

Family-owned & operated since its founding in 1939 by Max & Verda Foster

In 1939, a young couple named Max and Verda Foster started Foster Farms by borrowing \$1,000 against a life insurance policy and investing in an 80-acre poultry farm near Modesto, California. In 2014, Foster Farms celebrated its 75th anniversary on the very farm where Max and Verda first began all those long years ago, and we remain dedicated to raising poultry that is truly fresh and truly local.

OUR COMMITMENT TO MEETING THE NEEDS OF YOUR CONSUMERS

Insights*

- 53% of consumers agree that health claims guide their decision toward what to order.
- Americans consider food quality important—and they want the details to prove it. Quality may be gauged by what's not in a menu item (antibiotic-free) as well as what's in a menu item (natural, organic and local).
- All Foster Farms NAE (No Antibiotics Ever) and Organic fresh chicken products comply with USDA regulations, are minimally processed and contain no hormones or steroids.
- Ingredient scrutiny is encompassing farm practices, such as antibiotic usage, and is part of a larger movement that includes sustainability, local sourcing, humane treatment of animals and the absence of harmful ingredients.

Foster Farms Animal welfare standards:

The American Humane Association provides Foster Farms with a third-party, independent verification of ethical and science-based animal welfare practices.†

Foster Farms environmental practices:

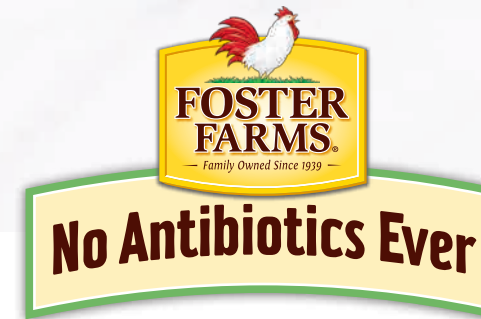

We have implemented environmental initiatives to promote recycling & reuse, increase energy efficiency, reduce & eliminate waste and improve air quality—all while protecting natural resources.‡

*Global Food Service Trends – Mintel 2016

†Based on a comprehensive audit of 200 separate items including diet, living conditions and natural behaviors.

‡Foster Farms has received California's highest environmental honors for our water, fuel and waste conservation programs: the Governor's Environmental & Economical Leadership Award (GEELA) and the POWER Award.
