

ARC International is the world leader in producing tabletop products - with capacity to produce over 5 million items throughout the world each day. Since 1825, ARC International continues as a family owned company specializing in glassware and tabletop products. ARC International is widely known as a pioneer group in researching new materials and effective solutions for our ever-changing world. For 187 years, we have served individuals and companies who have come to rely on ARC for its unparalleled ingenuity, high standards of excellence and above all...an unwavering commitment to our customers' needs.

Today ARC International is still family owned, and is led by a board of directors who carefully guide the group towards the established vision and goals that make ARC International a world leader. ARC continues to thrive with over 14,000 employees worldwide, and over 100 engineers dedicated to researching and developing products to meet the future needs in tableware. Manufacturing takes place in five countries where we work closely with each facility to maintain our high standards of quality, sustainable development, economic requirements, social responsibilities, and respect for the environment.

Arc International strives to be environmentally responsible and is proud to operate the cleanest glassmaking manufacturing facility in the world, located in Millville, N.J. As part of its long-term commitment to sustainability, ARC International invested nearly \$40 Million to expand capacity and find new ways to reduce primary emissions from its glass furnaces. The result is a new, state-of-the-art emission control system on all of its Millville furnaces.

SOLUTIONS FOR ANY OCCASION

In the dining room or at the serving station, mix and match to your heart's content the many shapes, colors, sizes, textures and qualities that make Cardinal's Portfolio of professional tabletop collections both versatile and uniquely suited for today's dining options.

Today's choices allow us to combine qualities that are important and unique to the foodservice and hospitality industry. The Cardinal Portfolio provides comprehensive solutions to your needs and your desires – from elegant AND strong to unique AND practical. We have a tabletop solution designed just for your needs.

The Cardinal Portfolio of dinnerware lines come in a variety of shapes, sizes and strengths from fully vitrified bodies and extra hard glazes to our own patented process of Extra Strong Porcelain[®] and Maxima[®] bodies. Our ceramic dinnerware stands up to the service required in fast-paced foodservice environments. Our fully tempered Opal[®] and Fully Tempered glass dinnerware bring value to the table with strength that is proven to be 3 times stronger than any ceramic body. Our latest material innovation in Zenix[®] brings unmatched scratch resistance, durability and beauty to the vigors of professional foodservice dinnerware.

Our Glassware lines are innovative, impressive and built to last in today's demanding foodservice environments. The collections range from annealed, rim tempered and Fully Tempered glass to Kwarx[®] material, each providing extra value to your establishment by reducing replacement costs.

Flatware is skillfully crafted into contemporary and classic designs using 18/10 stainless steel in a variety of gauges to meet your durability and practicality needs.

Cardinal offers solutions to your foodservice needs with your choice of over 4000 original designs. Let your imagination run wild and create a table setting that is perfect for your business: from durable AND practical to stylish AND elegant – mix, match, and then make it your own.
