

BYE-BYE, DRY. HELLO, ALOE.

New Aloe Synthetic Gloves Naturally Hydrate & Moisturize.

Gloves Are Infused With Aloe Vera Gel To Smooth & Soothe The Hands

Comfortable new Aloe Synthetic Gloves keep hands soft.¹

The aloe is released from the gloves and penetrates the skin's surface to help relieve and prevent dryness associated with frequent handwashing and glove use. Ideal for enduring tasks, the gloves provide exceptional protection throughout the day.

ALOE US TO INTRODUCE

Soft & Formfitting New Aloe Synthetic Gloves.

Aloe Vera Gel Reduces Moisture Loss & Skin Irritation

Certified pure by the International Aloe Science Council, the aloe in our new gloves softens the skin – so the longer employees wear the gloves, the better their hands feel and the more likely they are to wear them. Formfitting and flexible, the gloves also provide exceptional fingertip sensitivity for superior grip and performance. Plus, they come in a unique green color that is easy to identify for specific tasks, which reduces the risk of cross-contamination and helps keep your operation safe.

Our durable, disposable gloves assure enhanced protection for medium-duty, back-of-the-house applications and are ideal for food preparation and processing tasks like slicing, chopping and peeling.

From The #1 Name In Food Safety

Our new Aloe Synthetic Gloves bring you added protection from foodborne illness. Recognized as the leading name in safe food handling products and programs, FoodHandler's extensive line of high-quality food safety and worker protection products help protect your customers and business from foodborne illness outbreaks.
