**2. HAZARDS IDENTIFICATION**

**GHS Hazards** Aspiration hazard,

Aspiration hazard           Category 1

**Label elements according to the regulation (EC) no. 1272/2008 (CLP)**

**Hazard pictograms**

<b>Signal word</b>	Danger
<b>Hazard statements</b>	H304 May be fatal if swallowed and enters airways.
<b>Precautionary statements – Response</b>	P301 + P310 IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician. P331 Do NOT induce vomiting.
<b>Precautionary statements – Storage</b>	P405 Store locked up.
<b>Precautionary statements – Disposal</b>	P501 Dispose of contents/container only in accordance with local and national regulations.

**Other hazards**

<b>Emergency overview</b>	Contact may cause eye and skin irritation. For small children a single sip of lamp oil or even sucking the wick may lead to life-threatening lung damage.
<b>Potential short term health effects</b>	<b>Routes of exposure:</b> Eye, Skin contact, Inhalation, Ingestion. <b>Eyes:</b> May cause irritation. <b>Skin:</b> May cause irritation.

**SAFETY DATA SHEET**  
**HOLLOWICK LAMP FUEL**  
**USED IN: HD10, HD12TALL, HD26, HD2618HL & HD36TALL**  
**DISPOSABLE CELLS**

**Inhalation:** Excessive intentional inhalation may cause respiratory tract irritation and central nervous system effects (headache, dizziness).

**Ingestion:** May cause stomach distress, nausea or vomiting. Aspiration of material into lungs can cause chemical pneumonitis. May act as a laxative.

**Target organs**

Eyes. Skin.

**Chronic effects**

Prolonged or repeated exposure can cause drying, defatting and dermatitis.

### 4. FIRST AID MEASURES

#### Description of first aid measures

**General advice**

If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance. Avoid contact with eyes and skin. Keep out of reach of children.

**Following eye contact**

If splashed into eyes, flush with clear water for 15 minutes, or until irritation subsides. Remove contact lenses, if applicable, and continue flushing. Obtain medical attention if irritation persists.

**Following skin contact**

Remove contaminated clothing. Launder before reuse. Wash skin with soap and water. Obtain medical attention if irritation persists. Remove contaminated clothing. Launder before reuse.

**Following inhalation**

If symptoms develop move victim to fresh air. If breathing has stopped, administer artificial respiration, and seek medical attention immediately. If indicated, administer cardiopulmonary resuscitation. If symptoms persist, obtain medical attention.

**Following ingestion**

Do not induce vomiting. If vomiting occurs naturally, have victim lean forward to reduce risk of aspiration. Never give anything by mouth if victim is unconscious or is convulsing. Obtain medical attention.

#### Most important symptoms and effects, both acute and delayed

Prolonged/repetitive skin contact may cause redness, drying, defatting and cracking of the skin.

Symptoms of overexposure may be headache, dizziness, tiredness, nausea and vomiting.

#### Indication of any immediate medical attention and special treatment needed

Notes to physician: Symptoms may be delayed.

Medical conditions which may be aggravated by exposure: Sensitive skin. Skin contact may aggravate an existing dermatitis.

Variability Among Individuals: Health studies have shown that many petroleum hydrocarbons pose potential human health risks which may vary from person to person. As a precaution, exposure to liquids, vapors, mists or fumes should be minimized.

**5. FIREFIGHTING MEASURES**

<b>Extinguishing media</b>	Suitable: Dry chemical, carbon dioxide, foam, steam or water fog
<b>Unsuitable extinguishing media:</b>	Water streams will scatter liquid and spread fire but may be used to keep fire-exposed containers and surroundings cool.
<b>Special hazards</b>	May create dense smoke during combustion
<b>Fire hazard:</b>	Mild fire hazard when heated above its flash point; material must be preheated before ignition will occur (OSHA Class IIIB).
<b>Advice for firefighters</b>	Firefighters should wear full protective clothing including self-contained breathing apparatus. Stop source of fuel. Shut off ignition sources. Keep exposed containers cool with water spray.

**6. ACCIDENTAL RELEASE MEASURES**

<b>Personal precautions, protective equipment and emergency procedures</b>	Keep unnecessary personnel away. Do not touch or walk through spilled material. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Keep people away from and upwind of spill/leak. Remove all sources of ignition.
<b>Environmental precautions</b>	Do not discharge into lakes, streams, ponds or public waters.
<b>Methods and material for containment and cleaning up</b>	<u>For containment</u> Stop leak if you can do so without risk. Prevent entry into waterways, sewers, basements or confined areas. Contain the spill. <u>For cleaning up</u> Before attempting clean up, refer to hazard data given above. Small spills may be absorbed with non-reactive absorbent and placed in suitable, covered, labelled containers. Contact emergency services and supplier for advice. Never return spills in original containers for re-use.
<b>Reference to other sections</b>	See precautions in section 7 and 8.

**7. HANDLING AND STORAGE**

<b>Precautions for safe handling</b>	Use good industrial hygiene practices in handling this material. When using do not eat or drink. Wash hands before breaks and immediately after handling the product.
<b>Conditions for safe storage, including any incompatibilities</b>	Keep out of reach of children. Store in a closed container away from incompatible materials.
<b>Specific end use(s)</b>	Not applicable

**8. EXPOSURE CONTROLS/PERSONAL PROTECTION**

**Control parameters**

Exposure limit values

Component	Type	Value
Oil mist	TWA	5 mg/m <sup>3</sup>

**Exposure controls**

**Appropriate engineering controls**

General ventilation normally adequate. Use only with ventilation sufficient to prevent exceeding recommended exposure limit. Keep containers and storage containers closed when not in use. Do not store near heat, sparks, flame or strong oxidants.

**Personal protection**

Respiratory protection: Where exposure guideline levels may be exceeded, use an approved NIOSH respirator. Respiratory protection is not required under conditions of normal use. Wear an organic vapor respirator with a mist filter if vapor, mist or spray is generated.

Hand protection: Rubber gloves. Confirm with a reputable supplier first.

Eye protection: Eye protection is not required under conditions of normal use. Wear safety glasses with side shields when splashing may occur.

Body protection: Use chemical-resistant apron or other impervious clothing, if needed, to avoid contaminating regular clothing which could result in prolonged or repeated skin contact.

Hygiene measures: Handle in accordance with good industrial hygiene and safety practice. When using do not eat or drink. Washing with soap and water after use is recommended as good hygienic practice to prevent possible eye irritation from hand contact. Minimize breathing vapor or mist. Avoid prolonged or repeated contact with skin. Remove contaminated clothing; launder or dry-clean before reuse.

**10. STABILITY AND REACTIVITY**

<b>Reactivity</b>	This product may react with strong oxidizing agents.
<b>Chemical stability</b>	Stable under recommended storage conditions. This product is stable and will not react violently with water.
<b>Possibility of hazardous reactions</b>	Hazardous polymerization does not occur.
<b>Conditions to avoid</b>	Do not mix with other chemicals.
<b>Incompatible materials</b>	Strong oxidizers.
<b>Hazardous decomposition materials</b>	May include and are not limited to: oxides of carbon.

**11. TOXICOLOGICAL INFORMATION**

**Information on toxicological effects**

**Acute toxicity**

Oral

LD<sub>50</sub> (rat): > 5,000mg/kg

Harmful: May cause lung damage if swallowed. Product has a low order of acute oral and dermal toxicity, but as with most light liquid petroleum hydrocarbons, small amounts aspirated into the lungs during ingestion or vomiting may cause pulmonary injury: aspiration of material into lungs can cause chemical pneumonitis. May act as a laxative. May cause stomach distress, nausea or vomiting.

Inhalation

Alkanes, C<sub>14-16</sub>: LC<sub>50</sub> (rat): > 5.8 mg/l

White mineral oil (petroleum): Not available

Excessive intentional inhalation may cause respiratory tract irritation and central nervous system effects (headache, dizziness). Inhalation of mist or spray may be harmful.

<b>Irritation</b>	<p><u>For the skin:</u> May cause irritation. Prolonged or repeated skin contact with this product tends to remove skin oils possibly leading to irritation, reddening of skin progressing to dermatitis.</p> <p><u>For the eye:</u> This product may cause slight irritation to the eyes. When tested and evaluated according to FHSA Guidelines (16 CFR 1500.42) using albino rabbits, this product does not demonstrate ocular irritation potential.</p>
<b>Corrosivity</b>	Based on the available information on irritation, the mixture has no corrosive properties.
<b>Sensitization</b>	Not available
<b>Mutagenicity</b>	Not available
<b>Carcinogenicity</b>	Studies indicate no carcinogenic properties.
<b>Toxicity for reproduction</b>	Not available
<b>Repeated dose toxicity</b>	Repeated exposure may cause skin dryness or cracking.
<b>Aspiration toxicity</b>	May be fatal if swallowed and enters airways
